

The Dee Invasive Non-Native Species Project

Lyn Byrne
DINNS Project Officer

The Dee INNS Project.

A **catchment-wide partnership** initiative which aims to **co-ordinate** the control and monitoring of Invasive Non-Native Species within the Dee catchment to ensure a **joined up** approach to INNS management is delivered.

What INNS do we have in the Dee Catchment?

What INNS do we have in the Dee Catchment?

What INNS do we have in the Dee Catchment?

What's currently happening in the Catchment?

North Wales Wildlife Trust are carrying out a survey of the extent of Chinese Mitten Crab in the Dee

Cheshire Wildlife Trust are working with **Cheshire West and Chester Council** and the **Environment Agency** to control Giant Hogweed in Chester.

The **Alyn Valley Himalayan Balsam Project** is working to remove Himalayan Balsam from the River Alyn.

Snowdonia National Park Authority are controlling both Japanese Knotweed and Himalayan Balsam within the national park.

The **Ceiriog Knotweed Group** are working, with the support of **Keep Wales Tidy**, to control Japanese Knotweed on the upper Ceiriog.

The **Welsh Dee Trust** are working with **angling clubs** to survey and control Himalayan balsam and Japanese Knotweed on the main stem of the River Dee and some tributaries.

Future priorities?

How can you get involved?

-  Become a Volunteer River Guardian
-  Send in your INNS Records
-  Help us control INNS
-  Form a Local Action Group

Volunteer River Guardian Network

- 🍃 A network of volunteers across the catchment
- 🍃 Look after a 'patch' of river
- 🍃 Get access to training
- 🍃 Our eyes and ears on the ground

INNS Recording

- 🍃 All records are important
- 🍃 Send to Cofnod or Me
- 🍃 Photographs help us verify quickly
- 🍃 Use an App such as *That's Invasive*

INNS Control

-  Pull Himalayan Balsam
-  Get herbicide training
-  Hold an event during Big Dee Day
The Invasion 2014
-  Team building days

Local Action Groups

- Control INNS
- Raise Awareness
- Access to funding
- Vitally important for longevity

Why is Biosecurity Important to the DINNS Project?

- 🍃 Slow down spread within the catchment
- 🍃 Prevent new invasions
- 🍃 Protect sensitive habitats

DINNS Biosecurity Action

- 🌿 Biosecurity Risk Assessment
- 🌿 Biosecurity Action Plan
- 🌿 Biosecurity Workshops
- 🌿 Biosecurity Packs

Thank you!
